

ABOUT ME

Final-year ECE student with a CS minor at PES University, experienced in full-stack development and game development. Completed AI coursework to build technical depth. Looking to contribute to impactful engineering teams through innovative software solutions.

EXPERIENCE

Research Intern in L&T

Jan 2026 – July 2026

- Designed and developed an industrial autonomous robot with an embedded HMI display, including frontend interface development and backend system integration.
- Implemented LiDAR-based SLAM and multi-sensor fusion algorithms for real-time localization and mapping in structured environments.
- Developed embedded navigation and motion control logic on NVIDIA Jetson, enabling autonomous decision-making.
- Integrating AI/ML-based perception modules for object detection, obstacle classification, and intelligent navigation to enhance robotic autonomy.

AI / Agent Workflow Automation

Jun 2025 – Aug 2025

- Developed an AI Agent workflow automation pipeline capable of executing multi-step tasks with minimal human intervention.
- Fine-tuned, and evaluated supervised machine learning models for task classification using feature engineering, data preprocessing, hyperparameter optimization, and performance evaluation, achieving approximately 85% accuracy.

UAV Technology IISC Bangalore

Jun 2025 – Aug 2025

- Worked in the IISc UAV Lab for 2 weeks, contributing to the design of a UAV platform while gaining hands-on knowledge of UAV systems, including flight dynamics, aerodynamics, propulsion systems, and onboard electronics.
- Explored AI-enabled UAV applications, including computer vision, sensor fusion, object detection, and autonomous navigation using machine learning techniques.
- Gained hands-on exposure to drone architecture, sensor integration, flight controllers, and mission planning for autonomous aerial systems.

PROJECTS

Gaming Hackathon – PARALLAX

- Built an interactive game with dynamic maps, character logic, and real-time gameplay in Unreal Engine and Godot.
- Applied OOP principles while enhancing teamwork and problem-solving skills under tight deadlines.

EDUCATION

PES University, Bengaluru, Karnataka

2022 – 2026

B.Tech in Electronics and Communication (Major) with Minors in Computer Science

NRI Junior College, Guntur

2020 – 2022

Andhra Pradesh Board of Education

SKILLS

Programming Languages & Databases: Python, SQL, C, C++, JavaScript, MySQL, DSA, DBMS.

AI/ML: Machine Learning, Deep Learning, Computer Vision, Data Analysis, Feature Engineering, Model Evaluation, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents, Generative AI, Fine-tuning.

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, Flask, FastAPI, React.js, Node.js.

Tools & Technologies: Git, GitHub, Linux, VS Code, Jupyter Notebook, Docker, ROS2, LiDAR, SLAM, Sensor Fusion, Power BI, Fusion 360.

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Leadership, Communication, Research and Development (R&D).

ADDITIONAL INFORMATION

Hobbies: Solving puzzles, game development, space technology, financial analysis, sports, drawing, traveling, and Amazon affiliate marketing.
